## omron

## Frequency/Rate Meter K3MA-F

## Highly Visible LCD Display with 2-color (Red and Green) LEDs

- Contact, NPN, PNP, or voltage pulse input.
- Front-panel key operation for easy setting.
- Average processing function suppresses flicker.
- Includes scaling, auto-zero time, startup compensation time functions.
- Easy confirmation of max/min display.
- Short 80-mm depth (measured from edge of face plate).
- Finger protective cover (standard equipment) guards against electric shock.

${ }_{c}{ }^{\circ}{ }_{\text {us }}$ C $\epsilon$
- Water- and dust-proof NEMA4X (IP66 equivalent) front panel.
- Recognized to U.S. and Canadian requirements under the Component Recognition Program of UL.
- CE marking.

## Model Number Structure

## Model Number Legend

1. Input Type

F: Rotary pulse
2. Output Type

None: No output
A2: 2 relay contact outputs (SPST-NO)
3. Supply Voltage

100-240VAC: 100 to 240 VAC
24VAC/VDC: 24 VAC/VDC

## Ordering Information

List of Models

| Input type | Supply voltage | Output | Model |
| :--- | :--- | :--- | :--- |
| Rotary pulse | 100 to 240 VAC | None | K3MA-F 100-240VAC |
|  |  | 2 relay contact outputs (SPST-NO) | K3MA-F-A2 100-240VAC |
|  | 24 VAC/VDC | None | K3MA-F 24VAC/VDC |
|  |  | 2 relay contact outputs (SPST-NO) | K3MA-F-A2 24VAC/VDC |

Accessories (Order Separately)

| Name | Shape | Model |  |
| :--- | :--- | :--- | :--- |
| Splash-proof Soft Cover |  |  |  |
| Hard Cover |  |  |  |

## Specifications

Ratings

| Model | K3MA-F 100-240VDC, K3MA-F-A2 100-240VAC | K3MA-F 24VAC/VDC, K3MA-F-A2 24VAC/VDC |
| :---: | :---: | :---: |
| Supply voltage | 100 to 240 VAC | 24 VAC/VDC |
| Operating voltage range | 85\% to $110 \%$ of the rated supply voltage |  |
| Power consumption (under maximum load) | 6 VA max. | 4.5 VA max. (24 VAC) 4.5 W max. (24 VDC) |
| Insulation resistance | $20 \mathrm{M} \Omega \mathrm{min}$. (at 500 VDC) between external terminal and case. Insulation provided between inputs, outputs, and power supply. |  |
| Dielectric strength | 2,000 VAC for 1 min between external terminal and case. Insulation provided between inputs, outputs, and power supply. |  |
| Noise immunity | $\pm 1,500 \mathrm{~V}$ on power supply terminals in normal or common mode. <br> $\pm 1 \mu \mathrm{~s}$, or 100 ns for square-wave noise with 1 ns . | $\pm 480 \mathrm{~V}$ on power supply terminals in normal mode. <br> $\pm 1,500 \mathrm{~V}$ in common mode. <br> $\pm 1 \mu \mathrm{~s}$, or 100 ns for square-wave noise with 1 ns . |
| Vibration resistance | Vibration: 10 to 55 Hz , Acceleration: $50 \mathrm{~m} / \mathrm{s}^{2}$ <br> 5 min each in $X, Y$, and $Z$ directions for 10 sweeps. |  |
| Shock resistance | $150 \mathrm{~m} / \mathrm{s}^{2}\left(100 \mathrm{~m} / \mathrm{s}^{2}\right.$ for relay contact outputs) 3 times each on 3 axes, 6 directions. |  |
| Ambient temperature | Operating: $-10^{\circ} \mathrm{C}$ to $55^{\circ} \mathrm{C}$ (with no condensation or icing) Storage: $\quad-25^{\circ} \mathrm{C}$ to $65^{\circ} \mathrm{C}$ (with no condensation or icing) |  |
| Approved safety standards | UL3121-1, conforms to EN61010-1 (Pollution degree 2/overvoltage category II) Conforms to VDE0106/P100 (finger protection) |  |
| EMC | (EMI) EN61326+A1 Industry <br> Emission Enclosure: CISPR 11 Group 1 class A: CISRP16-1/-2 <br> Emission AC Mains: CISPR 11 Group 1 class A: CISRP16-1/-2 <br> (EMS) EN61326+A1 Industry <br> Immunity ESD: EN61000-4-2: 4 kV contact discharge <br>   <br> Immunity RF-interference: EN61000-4-3: 10 kV air discharge (amplitude-modulated, 80 MHz to 1 GHz) <br> Electrical Fast Transient Noise: EN61000-4-4: 2 kV (power line) <br> Immunity Burst Noise: 1 kV line to line (I/O signal line) <br> Immunity Surge: EN61000-4-5: 1 kV (power line) <br> Immunity Conducted Disturbance: EN61000-4-6: 3 kV line to ground (power line) to 80 MHz ) <br> Immunity Voltage Dip/Interrupting: EN61000-4-11: $0.5 \mathrm{cycle} 0,180^{\circ}, 100 \%$ (rated voltage) |  |

## Characteristics

| Input signal | No-voltage contact ( 30 Hz max., ON/OFF pulse width: 15 ms min.) <br> Voltage pulse ( 5 kHz max., ON/OFF pulse width: $90 \mu \mathrm{~s}$ min., ON voltage: 4.5 to 30 V/OFF voltage: 0 to 2 V ) <br> Open collector ( 5 kHz max., ON/OFF pulse width $90 \mu \mathrm{~s}$ min.) <br> Connectable Sensors <br> $\begin{array}{ll}\text { ON residual voltage: } & 2.5 \mathrm{~V} \text { max. } \\ \text { OFF leakage current: } & 0.1 \mathrm{~mA} \mathrm{max}\end{array}$ <br> Load current: Must have switching capacity of 15 mA min. <br> Must be able to dependably switch a load current of 5 mA max. |
| :---: | :---: |
| Measuring accuracy | $\pm 0.1 \%$ FS $\pm 1$ digit (at $23 \pm 5^{\circ} \mathrm{C}$ ) |
| Measurement method | Cycle measurement |
| Max. displayed digits | 5 digits (-19999 to 99999) |
| Display | 7-segment digital display, Character height: 14.2 mm |
| Polarity display | "-" is displayed automatically with a negative input signal. |
| Zero display | Leading zeros are not displayed. |
| Scaling function | Programmable with front-panel key inputs (range of display: -19999 to 99999 ). The decimal point position can be set as desired. |
| Hold function | Max hold (maximum value), Min hold (minimum value) |
| Hysteresis setting | Programmable with front-panel key inputs (0001 to 9999). |
| Other functions | Scaling teach function <br> Display color change (green (red), green, red (green), red) OUT type change (upper limit, lower limit, upper/lower limit) Average processing (simple average OFF/2/4/8 operations) Auto-zero time <br> Startup compensation time <br> Setting change lockout <br> Parameter initialization <br> Display auto-return time |
| Output | Relays: 2 SPST-NO |
| Delay in comparative outputs | 750 ms max . |
| Degree of protection | Front panel: NEMA4X for indoor use (equivalent to IP66) <br> Rear case: IEC standard IP20 <br> Terminals: IEC standard IP00 + finger protection (VDE0106/100) |
| Memory protection | Non-volatile memory (EEPROM) (possible to rewrite 100,000 times) |

## Measuring Ranges

## No-voltage Contact/Open Collector Inputs

| Input | Measuring range | Measuring accuracy | Displayable range |
| :--- | :--- | :--- | :--- |
| No-voltage contact ( 30 Hz max.) with <br> ON/OFF pulse width of 15 ms min. | 0.05 to 30.00 Hz | $\pm 0.1 \% \mathrm{FS} \pm 1$ digit max. <br> (at $\left.23 \pm 5^{\circ} \mathrm{C}\right)$ | -19999 to 99999 <br> (with scaling function) |
| Open collector (5 kHz max.) with <br> ON/OFF pulse width of $90 \mu \mathrm{~s} \mathrm{min}$. | 0 to 5 kHz |  |  |

## Input/Output Ratings

## Relay Contact Output

| Item | Resistive load ( $\cos \phi=1$ ) | Inductive load ( $\cos \phi=0.4, \mathrm{~L} / \mathrm{R}=7 \mathrm{~ms}$ ) |
| :---: | :---: | :---: |
| Rated load (UL ratings) | 5 A at 250 VAC, 5 A at 30 VDC | 1.5 A at 250 VAC, 1.5 A at 30 VDC |
| Rated carry current | 5 A max. (at COM terminal) |  |
| Max. contact voltage | 250 VAC, 150 VDC |  |
| Max. contact current | 5 A (at COM terminal) |  |
| Max. switching capacity | 1,250 VA, 150 W | 250 VA, 30 W |
| Min. permissible load (P level, reference value) | 10 mA at 5 VDC |  |
| Mechanical life | 5,000,000 times min. (at a switching frequency of 1,200 times/min) |  |
| Electrical life (at an ambient temperature of $20^{\circ} \mathrm{C}$ ) | 100,000 times min. (at a rated load switching frequency of 10 times/min) |  |

## Connections

## Terminal Arrangement

Note: Refer to Input Circuits on page F-55.

| Terminal No. | Name | Description |
| :--- | :--- | :--- |
| (A1- - A2 | Operation power | Connects the operation power supply. |
| (E4), E6 - E5 | Pulse input | No-voltage contact/open collector input |
| E1), E2 - E3 | Outputs | Outputs the relay outputs. |
| (B5)- B6 | External power supply | Use as the power supply for sensors. |

Block Diagram

Note: Relay output models only.

## - Input Circuits

## Pulse Input

## Operation

## Main Functions

## Input Types and Ranges

| Frequency range (setting parameter) | Function | Input range (setting parameters) |  | Setting range |
| :---: | :---: | :---: | :---: | :---: |
| Pulse frequency selection$\left(P-F_{r} E\right)$ | Selects pulse input signal. | 0.05 to 30.00 Hz | (30) | Displayable from -19999 to 99999 |
|  |  | 0 to 5 kHz | (51') | with scaling function. <br> The position of the decimal point can be set as desired. |

## Pulse Frequency Selection

| Parameter | Setting value | Meaning |
| :--- | :--- | :--- |
| FrE | 3 | 0.05 to 30.00 Hz <br> measurement range |
|  | $5 \mu$ | 0 to 5 kHz measure- <br> ment range |

Note: The default value is " 0 to $5 \mathrm{kHz}\left(5 \mu^{\prime}\right)$."

## Scaling

When the desired display value is set for a corresponding input, the value will be displayed on a line between two points determining the zero point.

| Parameter | Setting value | Meaning |
| :---: | :---: | :---: |
| -п¢ | - to 99999 | Input value for ${ }^{15 P}$ |
| -159 | - 19999 to 99999 | Display value for $\square^{\circ} \square^{P}$ |

| Parameter | Setting value | Meaning |
| :---: | :---: | :---: |
| $\sigma^{\prime \prime}$ | 0.0000 | Display four digits after decimal point |
|  | 00.000 | Display three digits after decimal point |
|  | 000.00 | Display two digits after decimal point |
|  | 0000.0 | Display one digit after decimal point |
|  | 00000 | No decimal point |

## Convenient Functions

Scaling Teach
 rameter, the actual input settings can be made with the following operation.

## OUT Types (Comparative Output Models Only)

OUT 1 and OUT 2 can be set to operate in one of the three following modes in accordance with the compared values:

- Upper limit (High Acting):

The output is turned ON when the measurement value is greater than its set value.

- Lower limit (Low Acting):

The output is turned ON when the measurement value is less than its set value.

- Upper and lower limits (Outside Band Acting):

An upper limit (H set value) and lower limit (L set value) can be set independently.
The output is turned ON when the measurement value is greater than upper-limit set value or less than the lower-limit set value.

## Upper Limit (High Acting)

Lower Limit (Low Acting)

Upper and Lower Limits (Outside Band Acting)

The three types of output operations shown above can be combined as desired. The following are examples of possible combinations.

Upper Limit 2-stage Output

[^0]
## Average Processing

Average processing stabilizes the display by minimizing any pulsating or flicker caused by fluctuations in the pulse width of sensor input or by eccentricity in rotating shafts.

## Hysteresis <br> (Comparative Output Models Only)

The hysteresis of comparative outputs can be set to prevent chattering in the output when the measurement value fluctuates finely near the OUT value.

Upper limit (high acting)

## Auto-zero Time

This function sets the time for the display to return to zero when input pulses stop. Set the time longer than the expected input pulse cycle (the interval between one input pulse and the next). Proper measurement is not possible if the time is set shorter than the input pulse cycle.

## Startup Compensation Time

The startup compensation time cancels measurement for a predetermined time when turning power ON, to prevent unwanted output due to temporary input fluctuations.

## Changing the Display Color

The color of the value displayed can be set to either red or green. For comparative output models, the display color can be set to change from green to red, or from red to green, according to the status of the comparison criterion.

## Display Auto-return Time

This function automatically returns the display to the operation level's current value if no keys are pressed for a preset time (called the display auto-return time).

## Move-to-Protect-Level Time

The time required to shift to the protect level can be set as desired.

## MAX/MIN Display

The maximum and minimum measurement (display) values from the time the power is turned ON until the current time can be stored and displayed. This is useful, for example, when measuring the maximum value.

Nomenclature

| Name | Functions |  |
| :--- | :--- | :--- |
| 1. Main indicator <br> 2. Opera- <br> tion indica- <br> tors | 1 | Displays current values, parameters, and set values. |
|  | 2 | Lit when output 1 is ON. |
|  | SV | Lit when output 2 is ON. |
|  | Min | Lit when a set value is being displayed or changed. |
|  | T | Lit when the main indicator is showing the MAX value. |
| 3. Level indicator | Lit when the teaching function is operable. Blinks while the teaching function is operating. |  |
| 4. MAX/MIN Key | Used to display the MAX and MIN values when a measurement value is being displayed. |  |
| 5. Level Key | Used to change the level. |  |
| 6. Mode Key | Used to allow the main indicator to indicate parameters sequentially. |  |
| 7. Shift Key | Used to enable a set value to be changed. When changing a set value, this key is used to move along the digits. |  |
| 8. Up Key | Used to change a set value. Used to set or clear a forced-zero function when a measurement value is being displayed. |  |

| Level indicator |  |
| :--- | :--- |
| $\square$ | Protect |
| Not lit | Operation |
| $\square$ | Initial setting |
| $\boxed{I}$ | Advanced-function setting |

## Dimensions

The K3MA-F uses M3 terminals. A terminal cover is provided.

## Application Examples

Displaying conveyor belt feed speed

- Monitoring line speed for a reflow furnace
- Displaying feed speed for food processing, conveying, sintering

Monitoring the rotations of a mixer or churner

- Mixers for resin molding
- Powdering/pelleting machines, centrifugal separators

Displaying the monitor output from an inverter as rotations or line speed

Note: If the monitor output from the inverter is analog, such as 0 to 10 V , use the K3MA-J.

- Monitoring conveyor speed
- Machining equipment (grinders, polishers)

## Installation

1. Insert the K3MA-F into the panel cut-out hole.
2. For a waterproof installation, insert the rubber gasket onto the body of the K3MA-F.

3. Fit the adaptor into the grooves on the left and right sides of the rear case, then push it until it contacts the panel to secure the K3MA-F.

## Wiring Precautions

- Use crimp terminals.
- Tighten the terminal screws to a torque of approximately $0.5 \mathrm{~N} \cdot \mathrm{~m}$.
- To avoid the influence of noise, route signal lines and power lines separately.

## Wiring

- Use the following M3 crimp terminals.

## Unit Labels (Provided) <br> Unit Labels (Provided)

- The unit labels are not attached to the K3MA-F. Select the desired labels from the provided sheet.

Note: For scales and gauges, use the unit labels that are specified by the relevant laws or regulations.

## Precautions

## WARNING

Do not touch any of the terminals while the power is being supplied. Doing so may result in electric shock.

## - $\triangle$ Caution

Do not disassemble the product or touch the internal components of the product while the power is being supplied. Doing so may result in electric shock.

## Caution

Do not allow metal objects or wire cuttings to enter the product. Doing so may result in electric shock, fire, or malfunction.

## - $\triangle$ Caution

Perform correct settings for the product according to the control application. Failure to do so may cause unexpected operation, resulting in damage to the product or injury.

## - $\triangle$ Caution

Take safety measures, such as installing a separate monitoring system, to ensure safety even if the product fails. Product failure may prevent comparative outputs from being generated, resulting in serious accidents.

Observe the following precautions to ensure safety.

1. Maintain the power supply voltage within the range specified in the specifications.
2. Maintain the load within the ratings specified in the specifications.
3. Check each terminal for correct number and polarity before connecting it. Incorrect or reverse connections may damage or burn out internal components in the product.
4. Tighten the terminal screws securely. The recommended tightening torque is 0.43 to $0.58 \mathrm{~N} \cdot \mathrm{~m}$. Loose screws may cause fire or malfunction.
5. Do not connect anything to unused terminals.
6. Provide a switch or circuit breaker so that operators can easily turn OFF the power supply when necessary. Also provide appropriate indications of such devices.
7. Do not attempt to disassemble, repair, or modify the product.
8. Do not use the product where flammable or combustible gases are present.

## Application

## General Precautions

1. Do not use the product in the following locations:

- Locations subject to direct radiant heat from heating equipment.
- Locations subject to exposure to water, oil, or chemicals.
- Locations subject to direct sunlight.
- Locations subject to dust or corrosive gases (particularly sulfuric gas or ammonia gas).
- Locations subject to severe changes in temperature.
- Locations subject to icing or condensation.
- Locations subject to shock or vibration.

2. Do not block heat dissipation around the product, i.e., provide sufficient space for heat dissipation.
3. Ensure that the rated voltage is reached within two seconds after the power is turned ON.
4. Conduct aging for 15 minutes min. after power is turned ON for correct measurement.
5. Do not touch the slit sections or terminals while the power is being supplied to prevent the product from being affected by static electricity.
6. Do not lay heavy objects on the product during use or storage. Doing so may deform or deteriorate the product.
7. Do not use paint thinner for cleaning. Use commercially available alcohol.

## Mounting

- Mount the product to a panel that is 1 to 8 mm thick.
- Install the product in a horizontal position.
- Use crimp terminals that match screw sizes.

## Noise Prevention

- Install the product as far as possible from devices that generate strong, high-frequency fields (such as high-frequency welders or sewing machines) or surges.
- Install surge absorbers or noise filters on nearby devices that generate noise (particularly motors, transformers, solenoids, magnet coils, and other devices that have a high inductance component).

- To prevent inductive noise, separate the terminal block wiring for the product from high-voltage or high-current power lines. Do not route the wiring for the product in parallel with or tie it in a bundle with power lines.
- When using a noise filter for the power supply, check for the voltage and current and install it as close as possible to the Frequency/ Rate Meter.
- Do not install the product near radios, television sets, or wireless devices. Doing so may cause reception interference.

## Increasing Service Life

- Do not use the product in locations where the temperature or humidity exceeds the ratings or where condensation may occur. When installing the product in a panel, be sure that the temperature around the product (not the temperature around the panel) does not exceed the ratings. The product service life depends on the ambient temperature. The higher the ambient temperature, the shorter the service life. To extend the product service life, lower the temperature inside the Frequency/Rate Meter.
- Use and store the product within the temperature and humidity ranges given in the specifications. When gang-mounting Frequency/Rate Meters or arranging them vertically, heat generated by the Frequency/Rate Meters will cause the internal temperature to rise, reducing the service life. In such cases, consider forced cooling methods, such as using a fan to circulate air around the Frequency/Rate Meters. Do not, however, allow only the terminals to be cooled. Doing so will increase measurement error.
- The life of the output relays is greatly affected by the switching capacity and switching conditions. Use these relays within their rated load and electrical life. The contacts may fuse or burn if they are used past their electrical life.

## Operating Procedures

## Levels

"Level" refers to a grouping of parameters. The following table lists the operations that are possible in each of the levels, and the diagram tells how to move between levels. There are some parameters that are not displayed for certain models.

| Level name | Function | Measurement |
| :--- | :--- | :--- |
| Protect | Setting lockouts. | Displaying current values, and setting OUT 1/2 set values. |
| Operation | Making initial settings of input type, scaling, output operating action, <br> and other parameters. | Stopped |
| Initial setting | Setting average processing, display color settings, and other ad- <br> vanced-function parameters. | Stopped |
| Advanced-function setting | Continue |  |

Note: The move-to-protect-level time can be set in the advanced-function setting level.

## Parameters

Note: 1. Some parameters are not displayed for certain models.
2. The K3MA-F will stop measurement if the level is changed to the initial setting level or the advanced-function setting level.
3. If the input range is changed, some parameters are set to default values. Therefore, set the input range first.
4. Settings displayed in reversed colors are defaults.

Press $\circlearrowleft$ Level Key + Mode Key for more than 1 s

## Operation/Adjustment Lockouts

Restricts key operations for operation level and adjustment level.

| Parameter | Setting | Operation level |  |
| :---: | :---: | :---: | :---: |
|  |  | Current value display | Set value display |
| GRP仡 | 0 | Allowed | Allowed |
|  | i | Allowed | Allowed |
|  | 2 | Allowed | Prohibited |

- Initial setting is 0 .
- This is not displayed on models with no comparative output function.

## Setting Level Lockouts

Restricts shifting to initial setting level or advanced-function setting level.

| Parameter | Setting | Shift to initial <br> setting level | Shift to <br> advanced- <br> function <br> setting level |
| :--- | :--- | :--- | :--- |
| $C P L$ | $\square$ | Allowed | Allowed |
|  | $\vdots$ | Allowed | Prohibited |
|  | $Z$ | Prohibited | Prohibited |

## Setting Change Lockout

Restricts setting changes by key operation. When this lockout is set, it is no longer possible to shift to a setting change mode.

| Parameter | Setting | Setting change by key <br> operation |
| :--- | :--- | :--- |
| $\mathscr{L P L}$ | $\bar{\sigma} F F$ | Allowed |
|  | $\overline{\sigma n}$ | Prohibited |

However, all protect level parameters can still be changed.

## Initial Settings

If required, shift to the advanced-function setting level to set

- the number of measurements for average processing,
', hysteresis values, auto-zero time, startup compensation time,
, display color change, display auto-return time, or move-to-
, protect-level time.

Press the Level Key $\oslash$ for less than 1 s min. to return to the operation level.

## Setting Example

## Initial Settings

The settings for the following example are shown here.
Example: Display conveyor belt feed speed

Here, the conveyor belt feed speed is to be displayed in units of $0.1 \mathrm{~m} / \mathrm{min}$.

- Proximity Sensor: E2E-X5E1, NPN output

When displaying a flowrate (e.g., in l/min or l/h), make the scaling settings after confirming the I/O characteristics of the flowrate sensor. There are flowrate sensors that output analog signals. If this kind of flowrate sensor is used, consider using the K3MA-J.

1. Select the maximum input frequency for the K3MA-F.

Set the pulse frequency selection to either 30 Hz or 5 kHz . In the example, this is set to 30 Hz because the conveyor belt is turning at a slow speed.
Parameter: P-FrE (pulse frequency), Setting value: 30
2. Set the scaling. The relationship between the display value and the input value is shown in the following equation.

| Rotations $(\mathrm{rpm})=$ | Frequency input/No. of pulses <br> per rotation $\times 60$ |
| ---: | :--- |
| Cycle speed D $(\mathrm{m} / \mathrm{min})=$ | Rotations $\times$ roll circumference |
| $=$ | $1 / \mathrm{N} \times \mathrm{f} \times 60 \times \mathrm{d} \times \pi$ |
|  | $\mathrm{N}:$ No. of pulses per rotation |
|  | $\mathrm{f}:$ Frequency $(\mathrm{Hz})$ |
|  | $\mathrm{d}:$ Roller diameter $(\mathrm{m})$ |

When the input conditions are applied to this equation, we obtain the following:
Display value $=1 / 1 \times f \times 60 \times 0.1 \times \pi$
For an input of 1 Hz , the display value is $18.8495(\mathrm{~m} / \mathrm{min})$.
The scaling settings for the K3MA-F must be integers. Also, to decrease error, the scaling value is multiplied by 1,000 , to obtain an input of 1000 Hz and a display value of 18850. However, because the display value in this case is displayed to the first decimal place, the scaling is set as shown in the following example so that 18850 is displayed for an input of 100 Hz .

| Parameter | Setting value |
| :--- | :---: |
| -100 |  |
| 150 |  |
| (scaling input value) | 1080 |
| (scaling display value) | 1000 |

Note: The decimal point position here refers to the position in the number after scaling. When setting the scaling display value, it is necessary to consider the number of digits to be displayed past the decimal point.

## Troubleshooting

When an error occurs, error details will be displayed on the main indicator. Confirm the error from the main indicator and take the appropriate countermeasures.

| Level <br> display | Main indicator | Error contents | Countermeasures |
| :--- | :--- | :--- | :--- |
| Not lit | $E: i l$ | RAM memory error | Repair is necessary. <br> Consult your OMRON sales representative. |
| 5 | $E: i l$ | EEPROM memory error | When this error is displayed, press the Level Key for 3 sec- <br> onds, and the settings will be restored to the factory set- <br> tings. <br> If the error cannot be recovered, repair is necessary. Con- <br> sult your OMRON sales representative. |
| Not lit | Flashes 99999 | The scaling display value exceeds 99999. | Promptly change the input to a value that falls within the <br> specified range. |
| Not lit | Flashes - 19999 | The scaling display value is lower than -19999. | The scaling value may be inappropriate. Review the scal- <br> ing value at the initial setting level. |
| Promptly change the input to a value that falls within the |  |  |  |
| specified range. |  |  |  |

## Warranty and Limitations of Liability

## WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.
OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

## LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS, OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.
In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.
IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

## Application Considerations

## SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.
At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.
The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products.

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.
NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

ALL DIMENSIONS SHOWN ARE IN MILLIMETERS.<br>To convert millimeters into inches, multiply by 0.03937 . To convert grams into ounces, multiply by 0.03527 .

Cat. No. N107-E2-03A In the interest of product improvement, specifications are subject to change without notice.
