

ZFX VISION SENSOR

Easy vision at a touch

» User guidance

» Touch, connect and go

» Interactive user interface

High performance with an easy touch

Omron's ZFX advanced vision sensor takes you into a new dimension of intuitive user guidance – Touch, Connect & Go

The built-in touch screen is easy to use and saves the user from getting involved with the complex technical details. It provides immediate feedback with live images and clear system messages during the entire set-up and inspection cycle. The ZFX offers assistance for lighting, filtering and automatic setting of parameters, which navigate users through the vision application.

The ZFX vision sensor comes as a one or two camera system, offering monochrome or colour functionality.

Get in touch and get going

Simply touch the large built-in LCD screen of the new ZFX vision sensor. Interactive menus guide you through the simple set-up of individual tasks in three easy steps.

1. Select inspection tools
2. Choose inspection regions
3. Set inspection parameters

You'll be ready to go in a matter of minutes. There's no need to connect a PC for set-up, maintenance or operation. The LCD screen provides instant feedback – showing interactive menus and useful information on the inspection status.

The AUTO button accesses the intelligence of the ZFX, automatically setting the parameters which have been proposed.

Complete set-up in minutes

Select inspection tools

Choose inspection regions

Set inspection parameters

Master any job - with the ZFX

This vision sensor allows the configuration of multiple inspections per image and lets you select from up to 20 image inspection or inspection support tools. Depending on the connected camera, the tools will process a monochrome or colour image providing colour filters and colour pickup options. Powerful image pre-processing, position compensation, calibration and data logging tools complete the ZFX functionality.

Position

Position compensation tools:

Allows compensation of the current object position in 360° rotation

Pattern

Pattern matching:

Searches for an object or finds deviations to a programmed object in 360° rotation

Area

Area:

Measures the size of objects

BCR

Code reading:

Reading and verification of barcodes and datamatrix

Position

Edge tools:

Finds the positions of edges, or measures the width of objects

Defect

Defect tools:

Finds minute defects in surfaces

Bright

Brightness/HUE:

Finds deviations in the brightness or colour of objects

Add func

Calculation:

Allows calculations with tool results and the definition of data output

Code reading (1D/2D) and inspections

The combination of barcode/datamatrix and powerful inspection items inside ZFX simplifies operation and reduces the space for the mechanical integration.

Multiple inspections

Multiple inspections ensure the reliable identification of a brake system for assembly, e.g. detection of the correct model, presence of left and right parts, etc.

Connect - Ethernet & more

The new ZFX features multiple interface options for smooth integration into any process environment, such as Ethernet, USB and digital I/O. This allows the communication of result data and images via the network, configuration uploads and downloads, the manipulation of settings, and much more. 20 digital I/O ports guarantee fast communication of time-critical control data like trigger inputs, binary result information, handshake or status outputs. A large number of documented communications commands enable the integration of the ZFX sensor into your existing process via any of its communication ports.

One sensor fits all

Pick the camera and controller suitable for the job. This guarantees maximum flexibility and helps minimise your investment costs.

The range of cameras provides a field of view from 10 mm to 150 mm, which allows you to inspect even large workpieces that previously could not be handled.

The ZFX features cameras with integrated lighting and a lens with adjustable focus. A c-mount camera, providing any lens/light combination, and a choice of controllers (with and without code reading) are also available. Depending on the connected camera, the controllers can work in monochrome or colour mode. The ZFX-C20/25 represents a two camera system for advanced applications.

Optimize your set-up with a click

Auto settings is a sophisticated built-in support function that applies optimum measurement conditions just by selecting AUTO. Automatically made settings can be checked and changed in each of the set-up screens.

Auto selection of colour filter

Select the optimum colour filter.

Step 1

Just press AUTO to automatically improve the contrast.

Step 2

The optimum filter is automatically selected from seven colour filters.

Auto set-up for light control

Set the perfect lighting in no time at all.

Step 1

Just press AUTO to automatically obtain optimum lighting measurements.

Step 2

Choose the correct lighting with just one click.

ZFX

Easy Vision – Touch, Connect & Go

- Easy vision – intuitive teach & go user interfaces
- Live – built-in LCD touch monitors for setup and immediate feedback
- Communication – centralized setup & inspection via Ethernet
- Versatile – app. 20 tools, 32/128 inspections per image
- Simplicity – auto-adjustment functions for easy image setup
- Flexible – 1 or 2 cameras, colour or monochrome
- Barcode and Datamatrix
